

ВИРЯД: ЗЕЛЕНИЙ МОНСТЕР

Петро Гафткович

03/05/22

Агой Хлопці,

Нижче наведено список усіх вирядів які зберігаються в Зеленому монстері. Метою цього списку є не тільки залишатися організованим, але щоб відстежувати стан нашого обладнання та мати можливість передбачити витрати на ремонт та кошт для МТ з року в рік.

Коли/як використовувати:

-Цей список потрібно бути перевірити та оновлювати щонайменше 2 і до 4 разів на року. Найбільш бажані часи:

-Перед МТ, планування - Виконує інтендант - Перегляд коментарів за попередній рік і перевірка того, чи придбано відповідне обладнання

-Після МТ - Виконується інтендантом - оцінка будь-якого пошкодженого, втраченого, недостатнього або великого обсягу обладнання, надання коментарів та ідей щодо майбутніх таборів

-Зимові вихідні - виконується курінним інтендантом - оцінює пошкодження, забезпечує організацію спорядження для зберігання

-Вихідні з дезимоутворення – виконано курінним інтендантом – оцінка будь-яких пошкоджень спорядження протягом зими. Список може бути корисним на зустрічах LOMT, щоб побачити, чи потрібно робити якісь серйозні налаштування або покупки для майбутнього МТ.

-Список віряд ідеально розглядається інтендантом (Курінний або МТ), оскільки це людина, яка має найбільші знання про наше спорядження і може дати уявлення про те, як покращитися в найближчі роки, задокументувавши для себе чи майбутніх інтендантів.

-Кожен пункт не потрібно переглядати кожен раз, коли ви переглядаєте список, оскільки це вичерпний процес. Якщо елементи відкинуті, інтендант може використати покажчик ззаду, щоб знайти предмет і видалити його зі списку. Якщо куплено новий товар, його можна додати до списку, а також додати до покажчика.

-Найефективніший спосіб використовувати це – робити нотатки про обладнання під час МТ, а потім оновлювати документ Google, коли помічається необхідність у ремонті/купівлі. Ці коментарі/занепокоєння слід додати до колонки КОМЕНТАРІ відповідного пункту. Кожного разу, коли інтендант доручається ознайомитися зі списком, його найважливішим завданням буде перевіряти будь-які коментарі, зроблені за минулий рік, оскільки це дасть найкращі підказки щодо того, які дії необхідно зробити до наступного МТ.

список поділений на 7 колонок:

1-й = Номер - Який номер?

2-й = назва предмета - як називається?

3-й = Скільки - Скільки у нас є?

4-й = Місце - В якій зоні?

5-й = Мета - Для чого ми його використовуємо?

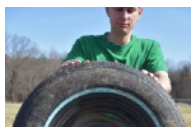

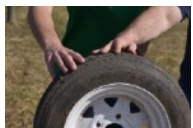

6-й = Поле для коментарів - Щось потрібно виправити?

7-е = Фото - як це виглядає?

Оновлення цього списку можуть також слугувати інструментом для молодих Калабанників, щоб використовувати їх як проєкт для переходу до водяника, за умови, що список буде оновлено та затверджено комісією. **[Максим Мирфі закінчив у червні 2022 року]**
